

## **HOW TO USE THIS TEMPLATE:**

### **Introduction**

The template reflects the steps set out in the PRINCE2® Method and is designed to prompt the Project Manager and help in the creation of the Project Brief. There is also a Product Description for the Project Brief at Appendix A of the PRINCE2 Manual.

### **Loading the file**

This template has been produced using Microsoft Word. To use it, load up the file directly from the directory and starting from page 1 follow the prompts in [...] brackets.

### **Deleting the [...] text**

When the template is complete, the whole Project Brief document can be printed and approved.

Prior to printing, you should delete all [...] prompt text.

### **Saving the Project Brief document under its own name**

Save the Project Brief document by selecting the “SAVE-AS” command; this will avoid overwriting the standard template. You must specify your own Project Directory.

### **Once your Project Brief is complete check the document against the following Quality Criteria:**

- It is brief because its purpose at this point is to provide a firm basis on which to initiate a project. It will later be refined and expanded as part of the PID
- The project brief accurately reflects the project mandate and the requirements of the business and the users
- The project approach considers a range of solutions, such as: bespoke or off-the-shelf; contracted out or developed in-house; designed from new or a modified existing product
- The project approach has been selected which maximizes the chance of achieving overall success for the project

- The project objectives and project approaches are consistent with the organization's social responsibility directive
- The project objectives are specific, measurable, achievable, relevant and time-bound (SMART).
